

Extraordinary Seed Crop: certainty for an uncertain future

Geronimo was founded with deep roots in agriculture and an understanding and respect for farming practices.

Extraordinary Seed Crop

Extraordinary Seed Crop is guaranteed revenue provided by having land and/or hosting turbines within the footprint of a Geronimo Energy wind farm. In uncertain times, our operating wind projects provide American farmers (our land partners) with certainty.

As we all know, the commodity markets fluctuate up and down and are unpredictable. Wind energy provides income certainty for generations to come. No other “seed crop” can promise that kind of certainty.

Diversify Your Income

We’ve all heard the phrase “Don’t put all your eggs in one basket.” The same premise goes for Extraordinary Seed Crop. Whenever you add revenue streams, you diversify your income, raise your income certainty and lower the risk related to your existing farming revenue.

We are farmer-friendly.

As landowner advocates, Geronimo is committed to providing each of its landowners with the best information possible, prompt responsiveness, and expert advice. Geronimo’s farmer-friendly development approach ensures that each of our projects will benefit the local area for generations to come. By reinvesting in our local cities and towns, Geronimo and community members are working towards building stronger rural communities. The notion of the Extraordinary Seed Crop arose from this core company value.
